## QUESTION

How can I create a simple 15 lite French Door?

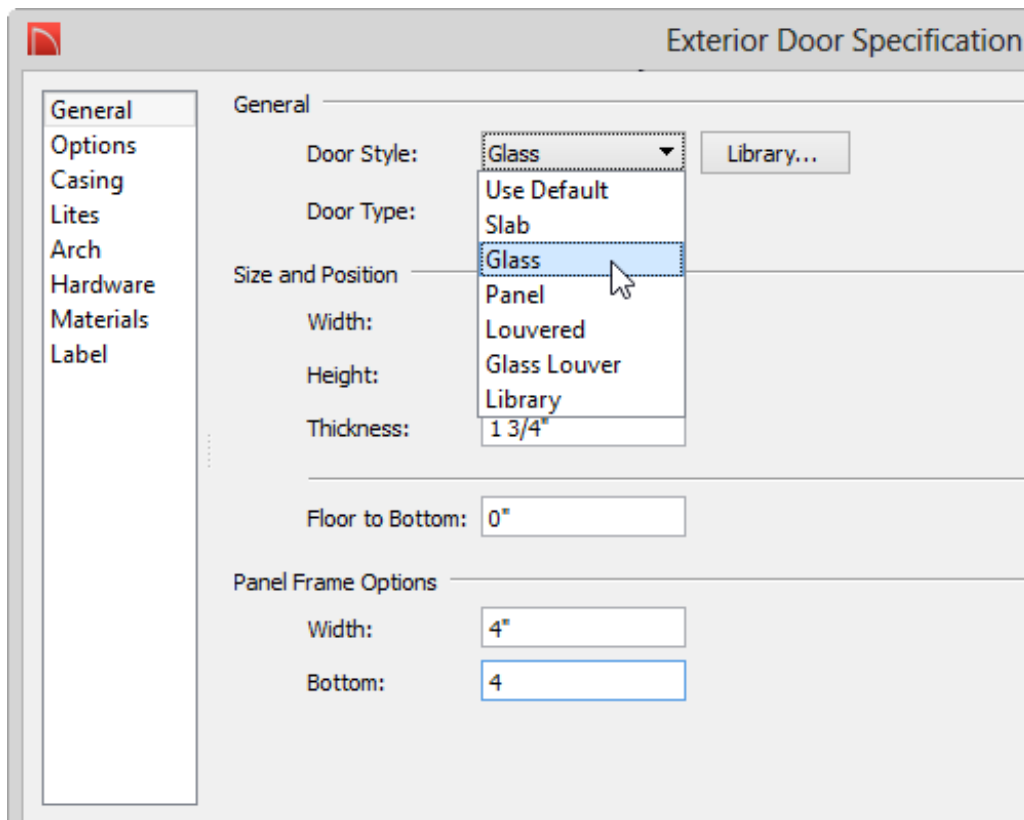

# ANSWER

A standard French Door can be easily created using the standard Door Tools.

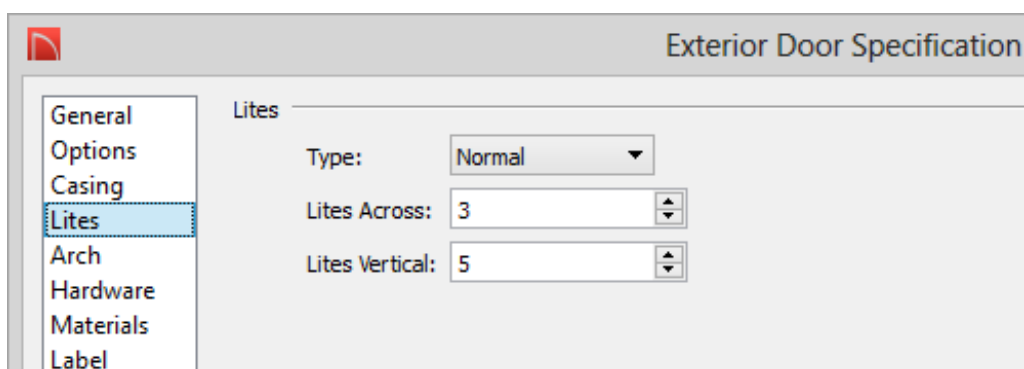

To create a French Door

1. Open the plan in which you would like to create a French door.
2. Select **Build> Door> Hinged Door**  from the menu and click on a wall to place a standard door at that location.
3. Click the **Select Objects**  tool, then click on the door to select it and click the **Open Object**  edit button.
4. In the **Door Specification** dialog:
  - On the **GENERAL** panel, click the **Door Style** drop-down arrow and select **Glass** from the list.
  - Under **Panel Frame Options**, change the **Frame Bottom** value to 4"

Double the Width of the door in the Door Specification dialog to automatically create a double french door at this location.

- On the **LITES** panel, change the **Lites Across** value to 3 and **Lites Vertical** to 5.

5. Click **OK** to close the dialog and apply your changes.
6. Finally, take a 3D **Camera**  view of the door to the results.
