QUESTION

I would like to delete framing items like my roof framing or wall framing. How can I do this?

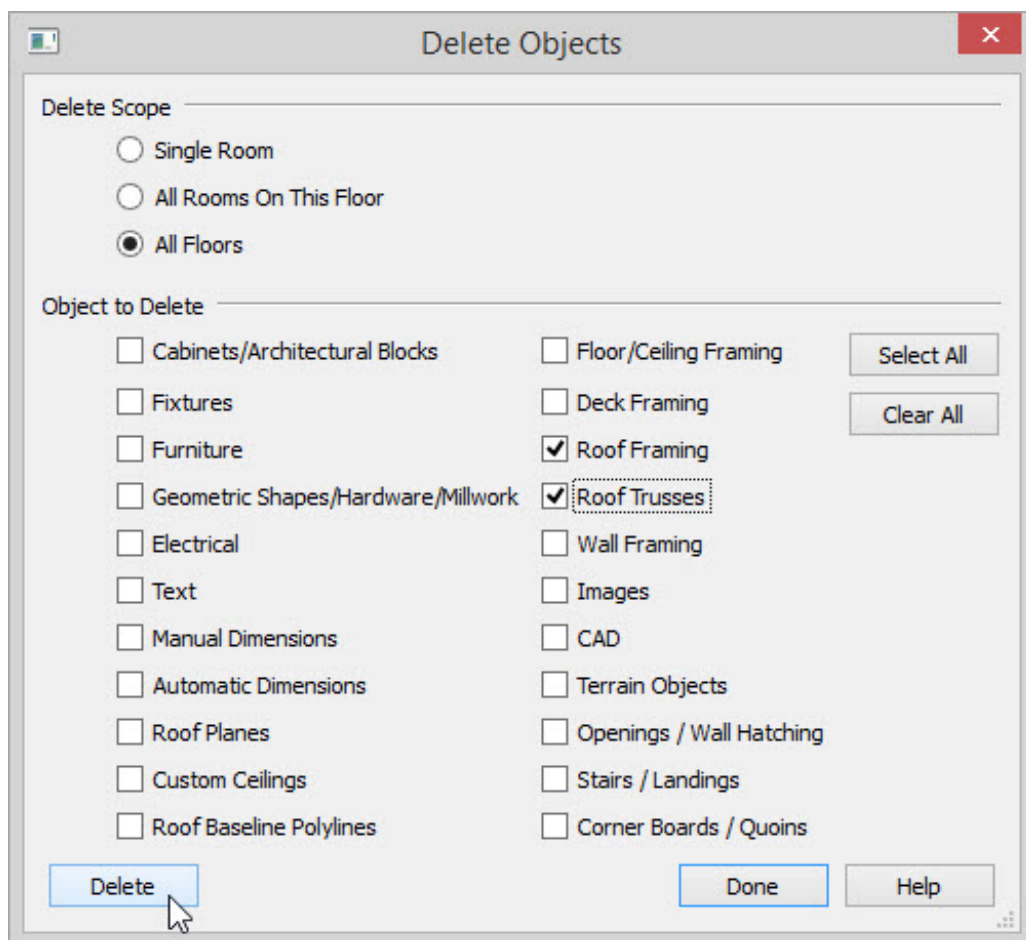

ANSWER

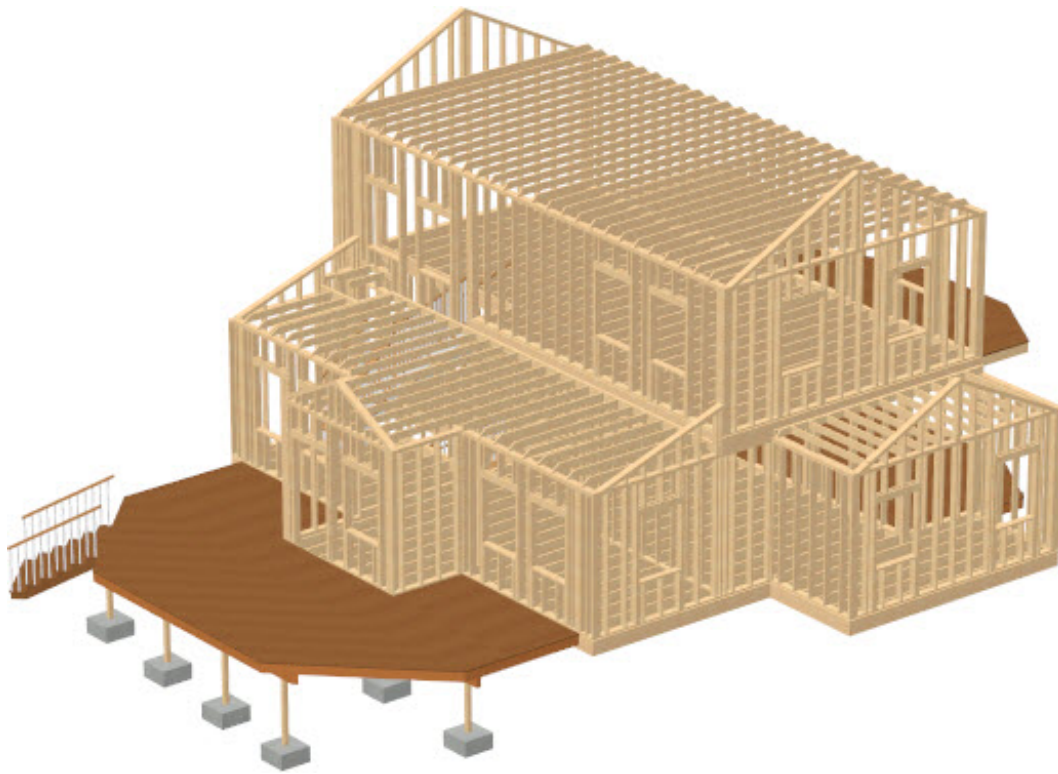

Deleting the framing you have generated is easy to accomplish when using the Delete Objects dialog.

To delete framing from your plan

1. Select **Edit> Delete Objects**  from the menu
2. In the **Delete Objects** dialog:

- Change the Delete Scope to **All Rooms** or **All Floors** depending on the location of the framing you want to delete.
 - Place a checkmark next to the types of framing you want to delete.
3. Click **OK** to close the dialog and apply your changes.

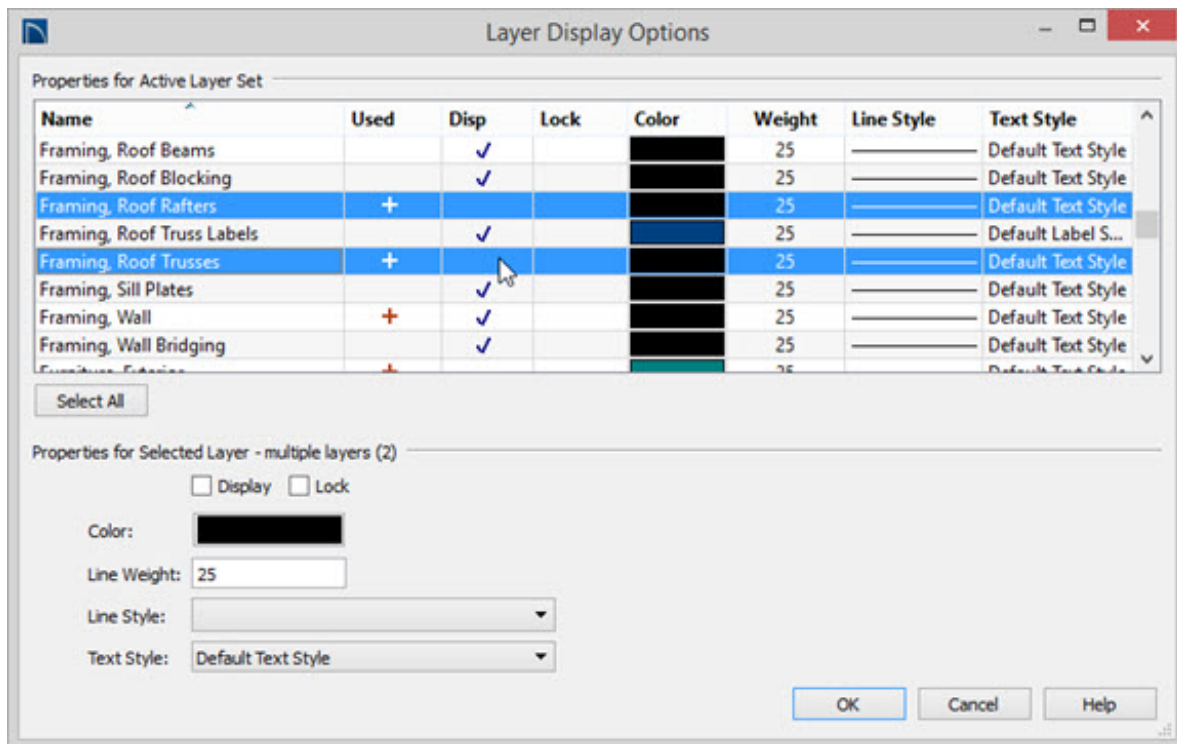

To turn off the display of framing

1. While in the view you do not want to see the framing displayed, select **Tools> Display Options** 

In Prior versions select Tools> Display Settings> Display Options.

2. Scroll down to the Framing layers and uncheck the **Disp** column.

3. Click **OK** to apply the change.
