QUESTION

I would like to delete framing items like my roof framing or wall framing. How can I do this?

ANSWER

Deleting the framing you have generated is easy to accomplish when using the Delete Objects dialog.

To delete framing from your plan

1. In a floor plan view, select **Edit> Delete Objects** from the menu

2. In the **Delete Objects** dialog:

---

- Choose your desired Delete Scope option.

  All Floors will delete all framing within the entire plan, while **All Rooms On This Floor** will delete all framing from all rooms on the active floor level. The Single Room option does not apply to framing.

- Place checkmarks next to the types of framing you want to delete.

3. Click **Delete** to close the dialog and apply your changes.

To turn off the display of framing

1. While in the view in which you do not want to see the framing displayed, select **Tools> Display Options** ☑

2. Scroll down to the "Framing..." layers and uncheck the **Disp** column or **Display** checkbox for each layer you don't want displayed.

3. Click **OK** to apply the change.
