QUESTION

How do I export a floor plan image to send to someone who does not have a Home Designer software product?

ANSWER

You can export an image of your floor plan by navigating to File> Export> Export Picture from the menu.

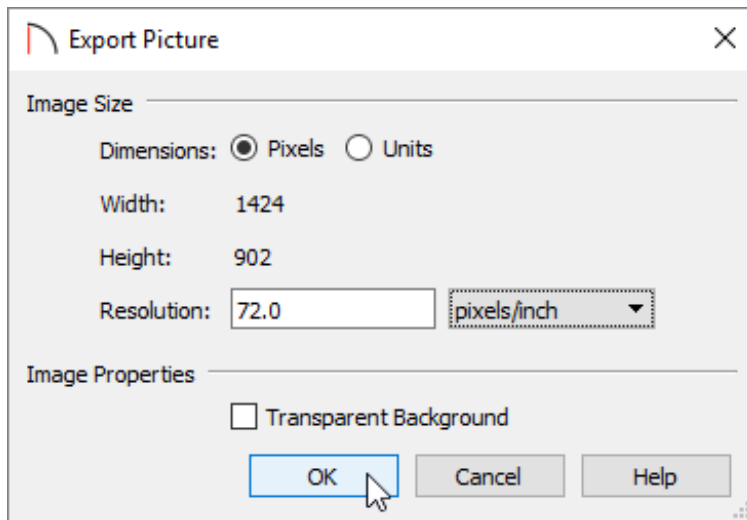

To export an image of your floor plan in Home Designer

1. Launch Home Designer and choose to **Open**  the plan you'd like to export an image from.
2. Make sure that you are zoomed in on the area you want to export.
 - Consider using **Window> Fill Window**  or **Fill Window Building Only**  to

bring all content or your entire structure into view prior to exporting.

3. Next, select **File> Export> Export Picture (BMP, JPG, PNG)** .

4. In the **Export Picture** dialog, specify the image properties to your liking, then click **OK**.

5. The **Export Picture File** dialog will follow. Enter in your preferred name in the **File Name** field, choose the desired file type using the **Save as type** drop-down, choose a location to save the image to, then click **Save**.

6. Repeat steps 1-5 for each additional floor level or view you'd like to create an image of.
