## QUESTION

How can I enter changes into certain cells, or fields, within a Materials List I created?

## ANSWER

You can make changes by double-clicking on a cell that contains a term or value you would like to modify.

### To edit cells within a Materials List

1. If you haven't already created a Materials List, select **Tools > Materials List > Calculate From All Floors**  from the menu to generate a Materials List for your entire plan.

**Note:** There are additional tools to create materials lists of more specific areas of your plan. 2. Double-click within a cell in the Materials List, then type in it to make changes.
