QUESTION

When I add a new cabinet to my plan and attempt to add glass doors to it, I am not able to select the Glass Doors option. How do I make glass doors when the option is grayed out other than selecting a glass door from the Library?

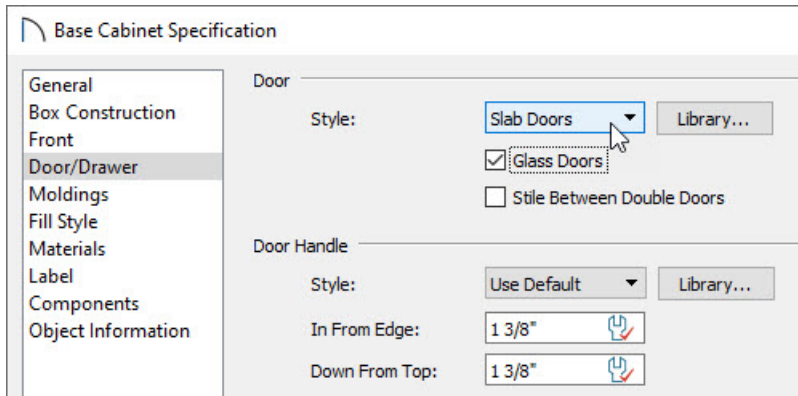

ANSWER

You will not be able to select the Glass Doors option until you choose a Door Style that Glass Doors can be applied to.

To add a glass door to a cabinet

1. From the menu, select **Build> Cabinet> Base Cabinet** , and click in your plan to place a base cabinet.
2. Next, use the **Select Objects**  tool to select the cabinet, and click on the **Open Object**  edit button to display the **Base Cabinet Specification** dialog.
3. In Home Designer Pro, select the **DOOR/DRAWER** panel, and under **Door Style**, use the drop-down menu to select **Slab Doors**, which allows you to check the **Glass Doors** Option.

Additionally, there is a selection of Glass Door styles that you can select by using the Library button located next to the Door Style.

4. When you have finished making changes, click **OK** to apply them and close the dialog.
