QUESTION

How do I create a cross section that can be expanded or contracted within a render view?

ANSWER

An adjustable camera view can be created using the Cross Section Slider dialog.

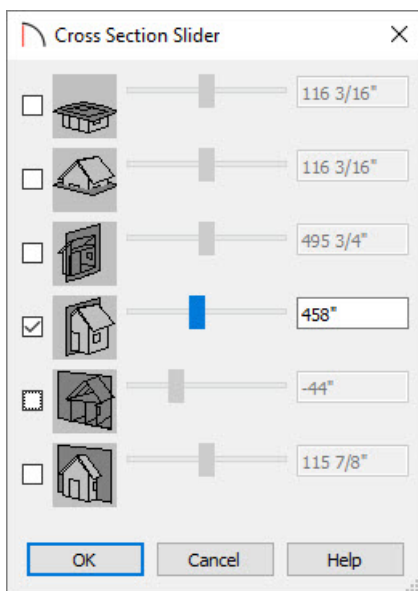

To create a sectional render view

1. While in a plan file, select **3D> Create Camera View> Full Overview** .

In Home Designer Interiors, use **3D> Create Camera View> Doll House View** .

2. Once the image has generated, select **3D> Camera View Options> Cross Section Slider** .
3. In the **Cross Section Slider** dialog, choose one of the cross section angles and move the Position slider to adjust the position of the cutting plane.

4. The image will update while the **Cross Section Slider** dialog remains open.

5. Multiple angles can be chosen by selecting the check boxes in the the **Cross Section Slider** dialog.

6. The view will update accordingly:
