## QUESTION

I would like to create dimension lines that display only in inches. How can I accomplish this?

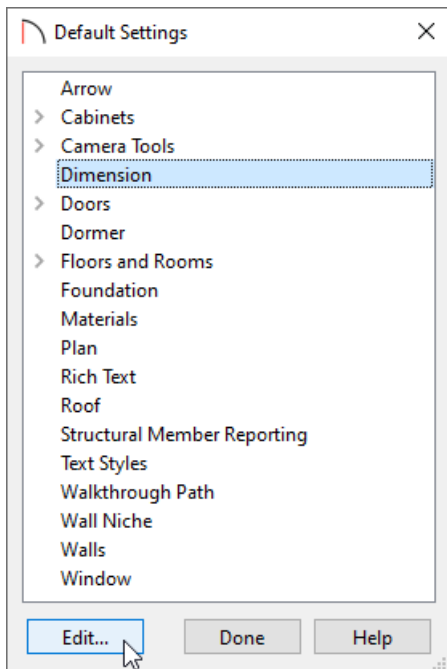

## ANSWER

In Home Designer, you have the ability to set your Dimension Defaults to display dimensions in feet and inches, feet, or just inches.

### To access the Dimension Defaults

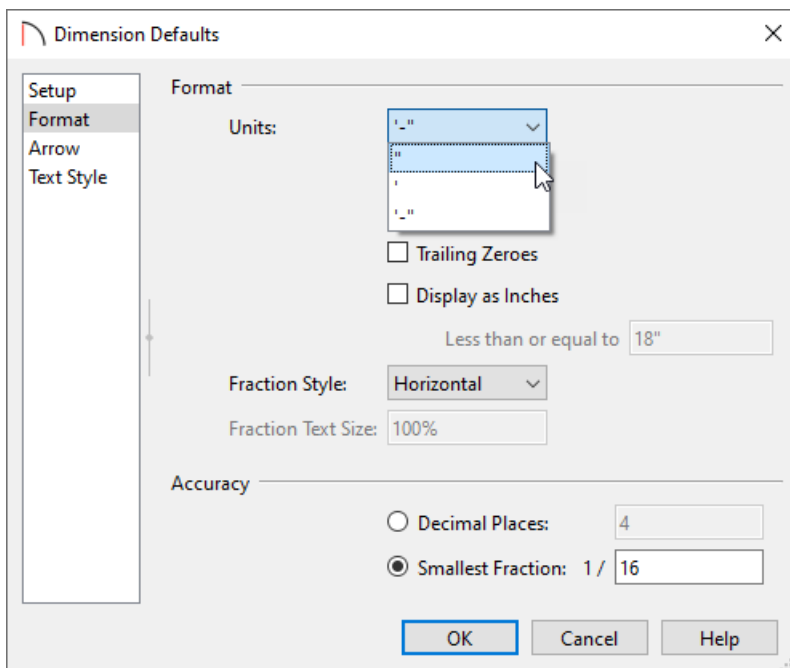

1. Select **Edit> Default Settings**  to display the **Default Settings** dialog.
2. Select the **Dimension** category to highlight it, then select the **Edit** button to open the **Dimension Defaults** dialog.

In Home Designer Pro 2021 and prior versions, expand the Dimension category, select Dimensions, then click the Edit button.

3. On **FORMAT** panel, use the **Units** drop-down menu and select " to have all created dimensions show inches only (example: 37" instead of 3'-1").

In Home Designer 2023 and newer versions, various fractional styles are also available, including horizontal, diagonal, and vertical.

4. Click **OK** and **Done** to confirm the change and close the dialogs.
