QUESTION

I would like to create dimension lines that display only in inches. How can I accomplish this?

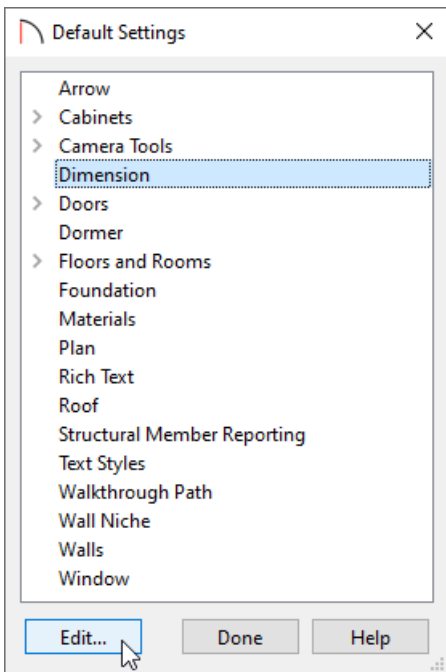

ANSWER

In Home Designer, you have the ability to set your Dimension Defaults to display dimensions in feet and inches, feet, or just inches.

To access the Dimension Defaults

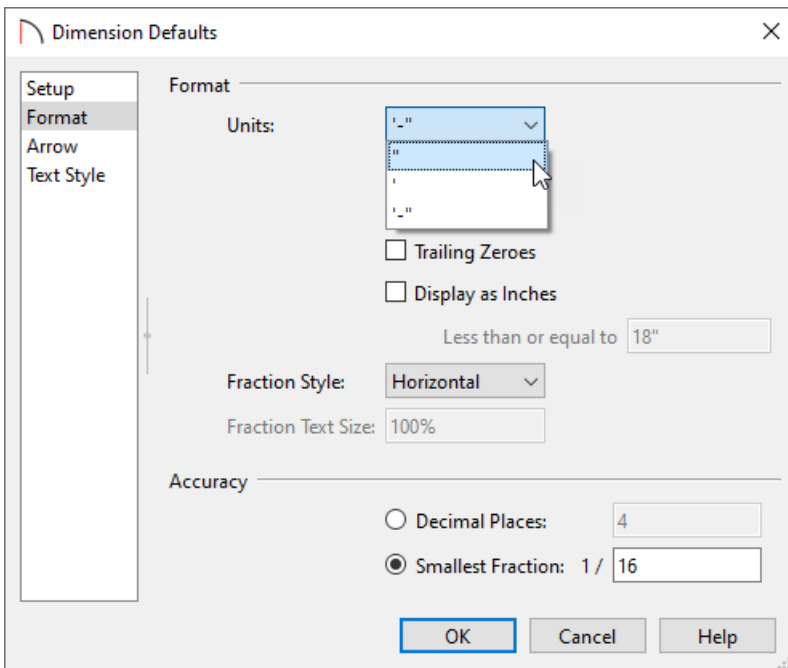

1. Select **Edit > Default Settings**  to display the **Default Settings** dialog.
2. Select the **Dimension** category to highlight it, then select the **Edit** button to open the **Dimension Defaults** dialog.

In Home Designer Pro 2021 and prior versions, expand the Dimension category, select Dimensions, then click the Edit button.

3. On **FORMAT** panel, use the **Units** drop-down menu and select " to have all created dimensions show inches only (example: 37" instead of 3'-1").

In Home Designer 2023 and newer versions, various fractional styles are also available, including horizontal, diagonal, and vertical.

4. Click **OK** and **Done** to confirm the change and close the dialogs.
