QUESTION

I have created my roof the way I want it to be displayed, but when I go to add new walls or adjust ceiling heights in my rooms, it changes the roof. How can I stop the roof from updating every time I make a change?

ANSWER

To stop the roof from rebuilding when a change is made to the plan, turn off the Auto Rebuild Roofs feature.

To turn off Auto Rebuild Roofs

1. First, launch your Home Designer program and **Open** the plan that contains your completed roof.

2. From the menu, select **Build> Roof> Build Roof** .

3. On the ROOF panel of the **Build Roof** dialog that opens, uncheck **Auto Rebuild Roofs**, then click **OK**.

4. With this setting disabled, the program will no longer automatically rebuild the roof if you make a change that affects the roof generation, such as to your exterior walls or ceiling heights.
