

Installing Library Content from Physical Media

Reference Number: **KB-01195**

Last Modified: **August 1, 2018**

The information in this article applies to:

DESCRIPTION

I have a physical DVD disk or USB flash drive of a Chief Architect or Home Designer program and want to install the program's Core Catalog content folder loaded from the physical media, instead of downloading it from the internet. Is this possible?

Information in this article does not apply to Chief Architect X5 and earlier versions, or Home Designer 2014 and earlier versions.

RESOLUTION

Follow the appropriate steps below for your operating system.

- Windows
- Mac

To install the core catalog files on Windows

1. **Save**  your work and exit out of the program if you have it open.
2. Insert the program DVD disk into your disk drive or the USB flash drive into a USB slot.
3. Once the media is inserted, an Autoplay prompt should appear allowing you to **Open** the physical medias contents. Once the media is open, select and open the **CoreContent** folder.
4. On your keyboard, hold the **Windows key**  and press **R** once to open a **Run** dialog.
5. In the **Open** line of the **Run** dialog, type **%programdata%** and click **OK**.
6. Locate and browse into the appropriate **Chief Architect** or **Home Designer** folder.
7. Copy the **Core Libraries (.calib)** files from the physical media into the **Core Libraries** folder in **ProgramData**.
8. Copy the **Referenced Files (.zip)** files from the physical media into the **Referenced Files** folder in **ProgramData**.

These are compressed files and should be placed directly into the Referenced Files folder. Do NOT unzip them.

To install the core catalog files on a Mac

1. **Save**  your work and quit out of the program if you have it open.
2. Insert the program DVD disk into your disk drive or the USB flash drive into a USB slot.
3. Once the media is inserted, an Autoplay prompt should appear allowing you to **Open** the physical medias contents. Once the media is open, select and open the **CoreContent** folder.
4. Next, open a new **Finder** window and in the menu select **Go> Go To Folder**.
5. In the dialog type **/Library/Application Support** and click **Go**.
6. Browse into the **Chief Architect** or **Home Designer** folder.
7. Copy the **Core Libraries (.calib)** files from the physical media into the **Core Libraries** folder in **Application Support**.
8. Copy these **Referenced Files (.zip)** files from the physical media into the **Referenced Files** folder in **Application Support**.

These are compressed files and should be placed directly into the Referenced Files folder. Do NOT unzip them.
