ANSWER

Follow the steps below to download the catalog files to your computer, then copy them to their respective locations.

It is recommended to create a folder on your computer, in an easy to access location such as your desktop, where you can save these files to, otherwise they will download to whatever default location your web browser is set to, typically your Downloads folder.

To download the Core Catalog files

1. One by one, right-click the following links and choose **Save Link As** (or appropriate counterpart for your internet browser), allowing you to save the file to a specific location.

Note: You must be signed in to your Chief Architect account to save or download the libraries linked below.

2. Direct it to save to the new folder you created.

3. Download and save the **Core Libraries** files:

- [CoreBackdrops.calib \(https://www.chiefarchitect.com/3d-library/index.php?r=site/download/672&version=7\)](https://www.chiefarchitect.com/3d-library/index.php?r=site/download/672&version=7)

Open both the folder containing the downloaded files, as well as the destination location where the catalog files will be copied to, then copy or move the files from the download folder to the core catalog folder.
