QUESTION

How do I change the toolbar button size in Chief Architect or Home Designer?

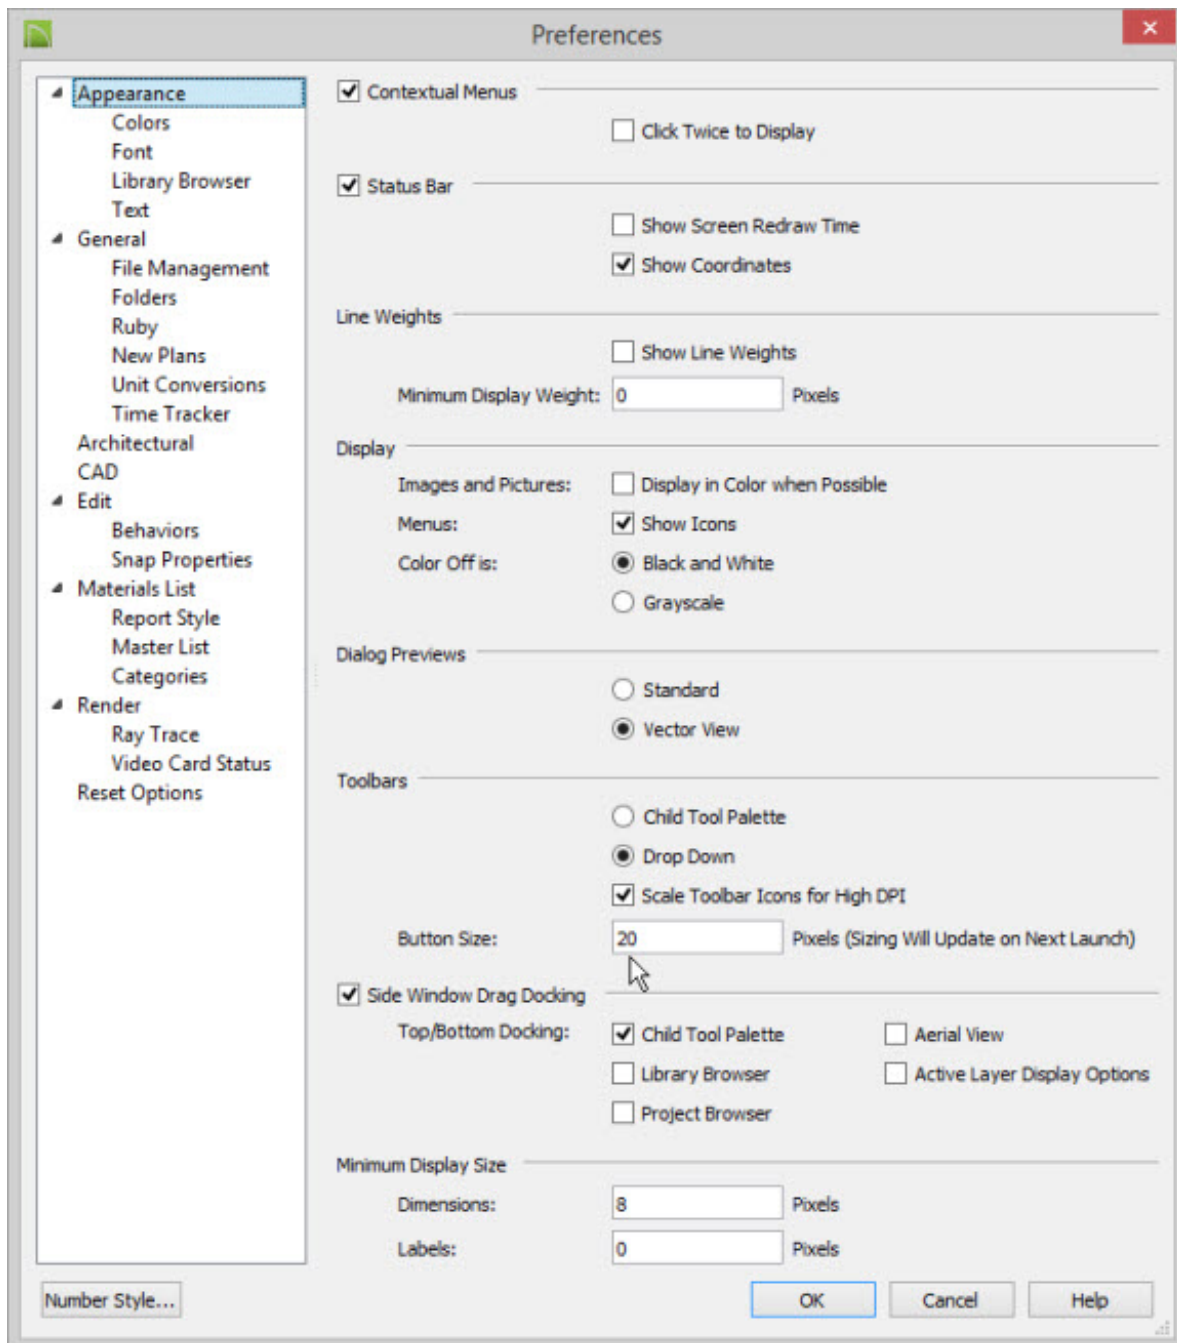

ANSWER

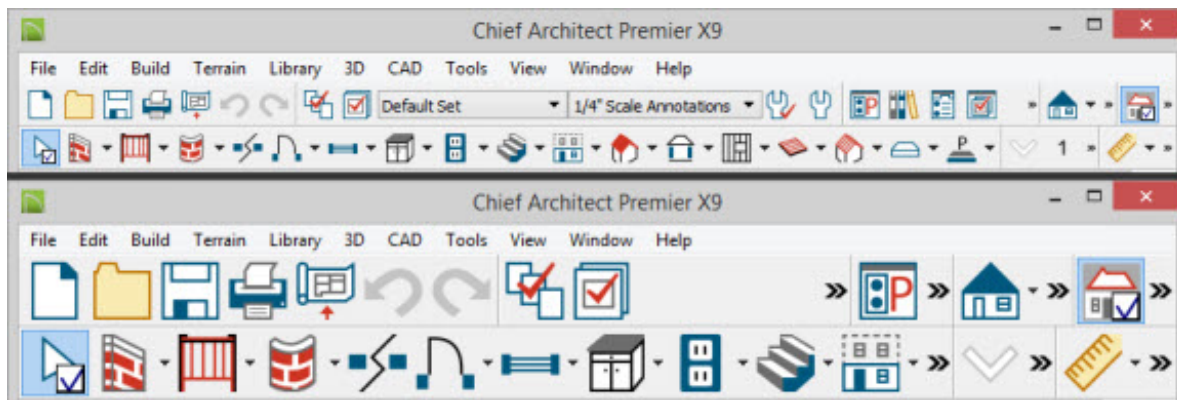

You can change the toolbar button size in Chief Architect X9 or Home Designer 2018 in the Preferences dialog.

To change the toolbar size

1. Open the **Preferences** dialog by selecting **Edit> Preferences** on a Windows computer, or **Chief Architect> Preferences** or **Home Designer> Preferences** on a Mac.
2. On the **APPEARANCE** panel under Toolbars, change the value to the right of **Button Size**, and then click **OK**. The higher the value entered here, the larger the Toolbar buttons will be.
In this example, the **Button Size** was changed from 20 to 40.

3. To see the change in button size, close Chief Architect or Home Designer, making sure to select **Chief Architect > Quit Chief Architect** or **Home Designer > Quit Home Designer** if you are on a Mac. When you reopen the program, the change in button size will have taken effect.

Note: Increasing the toolbar button size may result in tools no longer fitting on your toolbar. Such toolbar buttons can be viewed by clicking the double right arrow icons
